JOSIAH STEVE SAM

Software Engineer (AI) | Full-Stack Systems & Applied AI | Chennai, India (Open to Relocation)

+91 7373077757 · josiahsteve29@gmail.com · LinkedIn · GitHub

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building production-grade web platforms, backend services, and AI-enabled applications across SaaS, banking, travel, and EdTech. Experienced with React/Next.js, Python/Node.js, PostgreSQL, and multi-tenant systems, with hands-on work integrating RAG, LLMs, OCR, and agentic workflows into real-world products. Comfortable across application development, AI integration, deployment, and client-facing technical delivery.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

AI & Applied ML: LLM Integration, RAG, LangChain, LangGraph, LiteLLM, Prompt Engineering, Agentic Workflows, Embeddings, Hybrid Retrieval & Reranking, OCR & Document Intelligence, LLM Evaluation & Guardrails, OpenAI API, Hugging Face, PyTorch

Backend & APIs: FastAPI, Django, Node.js, Express.js, REST APIs, SSE Streaming, Microservices, OAuth2/JWT

Frontend: React.js, Next.js, Vite, HTML5/CSS3, Component Architecture, State Management

Databases & Search: PostgreSQL (RLS), MongoDB, Redis, Qdrant, Supabase

Cloud & DevOps: AWS (EC2, S3), Docker, GPU Inference, Nginx, Linux, CI/CD, Git

PROFESSIONAL EXPERIENCE

Credentech Solutions · Software Engineer (AI) *Apr 2026 – Present*
Chennai, India

- Own architecture decisions across retrieval, inference, and multi-tenant trade-offs; standardized design patterns now used across 2+ production services.
- Build full-stack AI products end to end: Next.js/React frontends, FastAPI services and REST APIs, PostgreSQL data models, and RAG pipelines with evaluation and guardrails.
- Design and prototype agentic workflows (LangChain, LangGraph, tool calling) and evaluate production feasibility ahead of platform roadmap decisions.
- Lead client-facing technical scoping for AI and full-stack deployments, and mentor an incoming engineer on RAG pipeline design and production debugging.

Credentech Solutions · Junior Software Engineer *Feb 2025 – Apr 2026*
Chennai, India

- Delivered 4 client projects across banking, SaaS, food & beverage, and travel, covering frontend, backend, AI services, and deployment.
- Built React/Next.js frontends and FastAPI and Node.js/Express backends on PostgreSQL, progressing from feature work to independent end-to-end ownership.
- Developed OCR and document-intelligence services with LLM-based extraction, validation, and structured JSON output, including GPU inference with automated failover.
- Secured APIs with OAuth2 and JWT, and built a PostgreSQL audit trail that reduced log-investigation effort by ~40%.

Quelit · Data Science Intern *Jul 2024 – Dec 2024*
Chennai, India

- Built an end-to-end regression pipeline in Python (EDA, validation, encoding, feature preprocessing) to predict student academic performance, comparing Scikit-learn models on R^2, RMSE, and MAE.
- Developed reusable ingestion, training, and prediction pipelines, and a persona-consistent chatbot (OpenAI API, Streamlit, MongoDB) with conversation storage and analytics logging.

PROJECTS

Credentra Agents: AI Agent Builder Platform (B2B SaaS) *Credentech Solutions*
Next.js, React, FastAPI, PostgreSQL, Qdrant, LiteLLM, NeMo Guardrails, Langfuse, Docker

- Launched a B2B SaaS where any business builds and publishes its own AI agents on 3 channels (website widget, chat page, WhatsApp) by decoupling channel adapters from one conversation runtime.
- Shipped tenant and admin portals in Next.js/React, an embeddable Shadow-DOM chat widget, and a FastAPI backend of 63 REST endpoints, streaming replies over SSE through a JWT API proxy.
- Isolated tenant data across 22 PostgreSQL tables (17 Alembic migrations) with row-level security, composite workspace keys, and role-based access control (3 roles, 13 permissions).
- Achieved ~90% grounded-answer accuracy at ~2s latency with hybrid Qdrant retrieval fused via RRF and a cross-encoder reranker that raised hit@1 from 0.77 to 0.95.
- Cut new-tenant setup from days to ~1 hour with self-serve ingestion of text, FAQs, files, and websites, using versioned revisions that go live only after an automated check.
- Cut unsafe/off-policy responses by ~30% by routing every model call through a gateway with rate limits, NeMo guardrails, and fallbacks, plus a citation fence that fails closed.
- Reduced critical-issue response time by ~40% and time-to-identify content gaps by ~50% by building human takeover with a live inbox and a report that groups unanswered questions.

OCR & KYC Pipeline – APB Bank, Laos *Credentech Solutions*
FastAPI, NVIDIA GPU, Nginx, PostgreSQL, OAuth2/JWT

- Reached ~95% field-extraction accuracy on 500+ KYC documents/day (passports, national IDs, family cards) with a GPU-accelerated OCR pipeline.
- Sustained ~99% uptime in production by designing fault-tolerant multi-node inference with automatic CPU fallback behind Nginx.

OCR Invoice Automation – Taco Bell Thailand *Credentech Solutions*
Typhoon OCR, LLMs, FastAPI, React, Vite, PostgreSQL

- Automated mixed Thai/English invoice processing at ~95% per-document accuracy across 5 templates by combining open-source OCR with rule-based field mapping.
- Shipped a monitoring dashboard with review and Excel export, deployed on the client's own infrastructure to keep financial data private.

TourExc – Travel & Tourism Booking Platform *Credentech Solutions*
React, Vite, Next.js, Node.js, Express.js, PostgreSQL

- Built customer, agent, and admin workflows for tour packages, bookings, leads, and cross-country pricing.
- Developed the B2B agent portal for partners to manage client bookings, plus admin tooling for multimedia listings and taxi bookings.

AI-Powered CBSE Learning Platform – Co-Founding Engineer *Freelance · 2026*
FastAPI, React, Next.js, Supabase, RAG, OCR + LLMs, Render

- Built curriculum-grounded AI subject tutors via RAG and a learning-assessment engine tracking 25 CBSE-aligned parameters (Bloom's Taxonomy, rule-based + LLM-assisted scoring).
- Cut estimated manual grading effort by ~50% with an OCR + LLM grading workflow for answer sheets; owned backend, AI services, frontend, and deployment of the 2-month MVP.

EDUCATION

Vellore Institute of Technology, *Vellore, India* *Sept 2020 – May 2025*
Integrated M.Sc., Computational Statistics and Data Analytics · CGPA: 7.64
